MOLE 650 compact saw for grooves

MOLE 650 COMPACT SAW FOR GROOVES

Mole 650 has been developed for sawing grooves to table tops. Mole 650 is compact and easy to use. It is extremely quick and effective to make grooves to table tops with this machine. It's very easy to place the piece straight against the side guide and set the start and end position of cutting. Machine makes the cutting automatically and returns to the home position. While coming back Mole dries the grooves ready for glueing. The table top is placed on rubber rollers to avoid scratches. This also makes sure that locking of rollers keeps the piece in place during the cutting. The both blades can be adjusted also horizontally to get the grooves to right position. The user can choose one or both blades for cutting. Cutting speed is adjustable.

Technical data

Machine length	3000 mm
Machine width	1200 mm
Machine height	1400 mm
Height of conveyor	800 mm
Cutting unit movement	2380 mm
Table top max width	650 mm
Plades up/down movement	80 mm
Cutting power	2 x 2,2 kW
Total weight	n. 600 kg
Power requirement	5 kW
Water requirement	30 ltr/min
Compressed air	6 bar

Kasins is a Finnish specialist designer and manufacturer of specific stone processing machinery and also complete automatic production lines.

Over 30 years design and manufacturing experience coupled with flexibility and close contact with the machinery operators have resulted in numerous bespoke value for money machinery designs.

Kasins utilises the latest high quality base components, cutting edge innovative product designs and latest in-house software technology to produce reliable, accurate, solid, easy to install and operate machines which require minimal maintenance.
