RAM edge polishing machine

RAM EDGE POLISHING MACHINE

Ram has been designed for polishing straight edges. The polishing head is planetary type head with four grinding wheels.

Polishing speeds can be altered in both oscillating and horizontal movements.

The polishing length of the polished stone can be easily altered.

The polishing frequency, time + any delays can be selected from the display panel.

In the middle of table is rotating unit for turning the stone.

Monkey has been designed as a compact easy to install machine as no foundations are required.

Technical data

Polishing head	ø 320 mm
Maximum length of polished stone	2000 mm
Height of the polished stone	120 ...250 mm
Machine length	3500 mm
Machine depth	2200 mm
Machine height	1900 mm
Main motor	5,5 kW
Polishing motor speed (adjustable)	450 rpm
Horizontal operation electrical, adjustable speed and movement	
Oscillating movement electrical, adjustable speed	
Type of polishing segment	terzago

Kasins is a Finnish specialist designer and manufacturer of specific stone processing machinery and also complete automatic production lines.

Over 30 years design and manufacturing experience coupled with flexibility and close contact with the machinery operators have resulted in numerous bespoke value for money machinery designs.

Kasins utilises the latest high quality base components, cutting edge innovative product designs and latest in-house software technology to produce reliable, accurate, solid, easy to install and operate machines which require minimal maintenance.
